

AED (Automated External Defibrillation)

Course Description:

Cardiac Arrest is one of the biggest killers in this country. Over 150,000 die as a result each year. It is a well known fact that the majority could have been saved if a defibrillator was made available. This very practical course will allow suitably qualified First Aid personnel to use the AED competently and with confidence should the need arise

Course Outline:

- anatomy & physiology of the respiratory & circulatory systems
- basic life support & CPR
- chain of survival & the benefits of early defibrillation
- UK resuscitation council guidelines
- operating an AED and safety guidelines

Course Duration:

4 hours

Assessment:

Practical and written assessment throughout. The tutor also ensures a thorough understanding has been achieved by questions, answers, discussion and practical scenarios

Certification:

Successful delegates receive a certificate of competence that will be valid for a period of 12 months

Extra Details:

Delegates receive a quality AED first aid manual. Sensible dress is advised as practical floor-based activities are required.
